BATISHA LABS

WHAT WE DO

Fix fragmented workflows.
Build controlled business systems.

Batisha Labs helps growing businesses, agencies, consultancies and professional services document critical processes, improve digital operations and introduce practical AI-assisted workflows with clear ownership and human oversight.

Built to automate. Designed to scale.

FOUR CONNECTED CAPABILITIES

01 FOUNDATION

Business Infrastructure

Define operating processes, documentation and responsibilities for repeatable execution.

02 OPERATIONS

Digital Operations Infrastructure

Map workflows, connect appropriate tools and clarify day-to-day handoffs.

03 AUTOMATION

AI Automation Systems

Design AI-assisted workflows for repetitive tasks with defined objectives and controls.

04 INTELLIGENCE

Governed Agentic Systems

Define permissions, approval checkpoints and human authority for agentic workflows.

WHO WE HELP

Growing businesses / Agencies / Consultancies / Professional services

Remote-first. International project inquiries welcome through a written brief.

batishalabs.com

A PRACTICAL STARTING POINT

Start with one workflow.

Build a clearer way to operate.

An initial engagement can focus on one workflow creating manual work, unclear ownership or unreliable follow-up. Exact scope and deliverables are agreed with each client.

ILLUSTRATIVE WORKFLOW / LEAD HANDLING

An example of control and accountability, not a completed customer case study.

LEAD	QUALIFY	ASSIGN	APPROVE	FOLLOW UP
Received	Defined rules	Clear owner	Human gate	Tracked action

POSSIBLE ENGAGEMENT DELIVERABLES

01 Current-state map

Document steps, owners, tools and bottlenecks.

02 Improvement design

Define a clearer workflow and suitable automations.

03 Control boundaries

Specify human approvals, access and accountability.

04 Implementation handoff

Agree scope, tests, documentation and next actions.

OUR ENGAGEMENT PATH

01 Clarify — 02 Map — 03 Design — 04 Implement — 05 Verify

HAVE A WORKFLOW TO IMPROVE?

Start with a written project brief.
